SUMMARY

MERN Stack Developer and Computer Science graduate (May 2026) with practical experience building and deploying full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Completed a frontend developer role at Toshal Infotech, integrating RESTful APIs and applying secure coding practices across production-grade UI components. Built impactful projects including a Python-based facial recognition attendance system (80% reduction in roll-call time) and an AI task orchestrator (25% improvement in workflow completion). Certified AWS Cloud Practitioner with hands-on exposure to AI agent architecture through IBM SkillBuild. Skilled in JavaScript, C++, Java, and cybersecurity principles, with a strong focus on responsive design, cross-browser compatibility, and clean, maintainable code. Seeking entry-level roles in frontend development, full-stack engineering, or AI-integrated web applications.

SKILLS

Languages: HTML · CSS · JavaScript · Python · C · C++ · Java · PHP **Frameworks:** React.js · Node.js · Express.js · MongoDB
Cloud & Tools: AWS · Git · GitHub · RESTful APIs **Other:** Cybersecurity Principles · Problem Solving · Responsive Design

EDUCATION

B.E. Computer Science — CGPA: 7.74	S. N. Patel Institute of Technology & Research Centre · May 2026
HSC — 12th Science (60.5%)	Jeevanbharti Uchchttar Madyamik Vidhyalaya, Surat · Mar 2022
SSC (70%)	Jeevanbharti Uchchttar Madyamik Vidhyalaya, Surat · Mar 2020

EXPERIENCE

Frontend Developer	Toshal Infotech · Surat, Gujarat · Jan 2026 – Mar 2026
- Developed and optimised interactive UIs using React.js, ensuring cross-browser compatibility and responsive design. - Integrated RESTful APIs and managed state with modern libraries to enhance application performance. - Applied secure coding practices to frontend components, focusing on data integrity and user authentication workflows.	
Intern — AI Agent Architect	IBM SkillBuild · Remote · Jun 2025 – Jul 2025
- Completed “From Learner to Builder: Become an AI Agent Architect” program via IBM SkillBuild. - Gained hands-on experience in AI agents, data analysis, and Python-based workflows. - Collaborated on full-stack web development tasks as part of a team project.	

PROJECTS

Smart Attendance System	Python-based facial recognition system reducing manual roll-call time by 80% and eliminating proxy attendance.
AI-Task-Orchestrator	React.js app that dynamically prioritises workflows, improving task completion rates by 25%.
Weather Application	Responsive React.js app integrating live API data for real-time, location-based forecasts.

CERTIFICATIONS

• AWS Cloud Practitioner • AWS Billing and Cost • SAP Logistics Management
